Mao: The Unknown Story
By Jung Chang & Jon Halliday
This book is not as well received by the readers as Chang’s first book Wild Swans. Some dislike it for containing too many dry details that are too hard for non-Chinese to digest while some others question the objectiveness of the authors. The book may be suitable more for historians than the average reader.

Dr. Li Zhisui
Unlike the biography Mao Zedong written by Jonathan D. Spence, this book offers a personal and detailed account of the Chinese dictator's private life - Dr. Li was Mao's personal physician for 23 years. The book is banned in China because the Chinese government views it as nothing but a bunch of defamatory lies. You be the judge.

Mr. China: A Memoir
by Tim Clissold
A British business consultant trained in physics at Cambridge University, Clissold joined up with a Wall Street banker-turned entrepreneur in the early 1990s and together they embarked on a decade-long adventure in China investing in a wide range of Chinese businesses scattered across the country. The narrations of his intense conflicts with the managers of the Chinese businesses his firm invested in are so vivid that they beat fiction! Clissold could easily turn his rivalry with Old Shi into a movie. Tim studied Chinese in Beijing for two years before meeting the American banker in Hong Kong and is very fluent in this acquired language. His narrations sometime go off track, which may be annoying to readers who already have a good understanding of China. But those off-topic observations show the depth of his knowledge of China, which may be the reason that his editor did not ask him to cut them. This book chronicles so well China’s chaotic but rapid economic expansion in the decade post-Deng Xiaoping’s “Southern Tour” in 1992 that anyone interested in China’s explosive economic growth should read it.

China Pop: How Soap Operas, Tabloids and Bestsellers Are Transforming a Culture
By Jianying Zha
Amazon editors wrote: “China Pop is a highly original and lively look at the ways that contemporary China is changing. Jianying Zha, hailed by The Nation as “incisive, witty and eloquent all at once,” examines a wide range of developments largely unknown to Western readers: the careful planning of television soap operas to placate popular unrest after Tiananmen, the growth of the sex tabloid and pornography industries, and the politics of censorship and commercial
success of the film directors Chen Kaige (Farewell My Concubine) and Zhang Yimou (Ju Dou and Raise the Red Lantern).” Another book by the same author, Tide Players: The Movers and Shakers of a Rising China, is also highly recommended.

The book is well researched with authoritative introductions to the various attractions. The editors and contributors all have long experience living in China making them sound like locals, not the typical travel writer. Unlike Lonely Planet and Rough Guide, Frommer’s China is more geared towards middle class consumers, which is why the latest edition no longer talks about cheap hotels for backpackers.
